Qualities

- Teamwork
- Creativity
- Empathy
- Leadership
- Passion for learn

PROFILE

I'm a passionate person about programming, who seeks to grow every day and expand his knowledge in web development. I have solid knowledge in HTML, CSS, JavaScript, React.JS and MySQL. In backend I have worked with Node.js to build servers, API requests from the frontend and database with MongoDB. I also have experience working with C# and ASP.NET. I have great skills in communication, teamwork, empathy and creativity to personal growth. Right now I seek to improve myself every day and be a better web developer.
